

New and always included in BusinessTravel Assist from now on:

More security worldwide with the World Watch® Database!*

Starting immediately, all companies that protect their employees during travel using BusinessTravel Assist have access to the World Watch® country database. Providing well-founded information on the security situation of a particular destination country, the database makes it possible to reduce travel risks and quickly and efficiently react to suddenly changing situations in the destination country.

Features of the World Watch® Database:

- ▶ Classification of all countries into five Risk Levels
- ▶ Background country information on current and historical events
- ▶ Information on culture and security with recommendations for behavior
- ▶ Current information on announced strikes or demonstrations
- ▶ Comprehensive map materials, country and city profiles, and contact addresses
- ▶ Overview of public transportation and infrastructure relevant to travel
- ▶ The database is maintained and updated around the clock by analysts and security experts using 12,000 information sources worldwide

Your advantages:

- ✓ Complete Travel Risk Management
- ✓ Access to insider information and worldwide travel notices
- ✓ Makes planning business travel easier
- ✓ Assessment and minimization of individual travel risk
- ✓ Taking preventive measures or quickly being able to react to suddenly occurring events
- ✓ Best-possible compliance with the legal obligation of companies to provide benefits and medical welfare for employees sent to foreign countries
- ✓ It is possible to integrate a version of the World Watch® Database that is customized to your company into your Intranet.**
